Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Wednesday 01 Sep 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Largely cloudy, although some brighter conditions developing in west.

Today:
Cloudy start, with most places dry, although the odd spot of drizzle is possible. Cloud will thin through the day, with some brighter spells developing. Best of the afternoon sunshine in the west. Staying rather dull and breezy along coasts. Maximum temperature 16 deg C (61 deg F).

Tonight:
Any evening clearer spells becoming limited as cloud thickens and spreads westward overnight, but likely staying dry. Cloud thinning a little for some northwestern parts around dawn. Minimum temperature 8 deg C (46 deg F).

Thursday:
Cloud more readily dispersing through the morning for inland areas, although still lingering near coasts. Sunny spells then developing during the afternoon, perhaps becoming unbroken across some western parts. Maximum temperature 16 deg C (61 deg F).

Outlook for Friday to Sunday:
Another cloudy start Friday, with some drizzle, but brighter spells later. Little change Saturday, although winds strengthening through the day. Likely staying dry, but windy Sunday. Rather cool throughout.
